

**SESTADISOPRA**

Dear friends

This is the letter we annually send with sincere affection to all the friends and to those persons, that are several, than through the passion for the culture of wine have come to visit us last year.

Enzo Bianchi on the newspaper "La Stampa" in the month of September 2006 wrote one skilful article entitled:

WINE, TRUTH AND LIFE  
The glass of the friendship that gives "flavours" to life

We would like to start from this words to remember and to be remembered from all those who have known us and with which we shared our experience in Montalcino.

This is our passion: it has the vine and the wine cellar as background, its hard work, its joys, its culture.

"... the patrimony of human wisdom that always gives effloresce from the rows of grape and that it has always impregnated hundred of verses of the Bible and universal poetry ..."

We think that the wine in order to manifest its sacrality must be conserved and be used for the familiar ceremonies that we wish will always be full of happiness.

The last grape harvest for the Brunello and the Rosso di Montalcino could be a vintage to remember. In fact the grapes have been of quality. The concentration of the grapes has been optimal and therefore also the polyphenols.

In the manifestation "Benvenuto Brunello" scheduled for the 23/24/25/26 days of February we expected a declaration from the Commission of experts, than confirms the expectations with an important star number.

We hope that the new year is well begun for you all and your families and we take the opportunity to invite to you to Montalcino and to Sesta di Sopra.

*Best wishes Ettore, Anica*
