

Sesta di Sopra Vineyard *MAGISTRA*

The vineyard was planted in the 1990 with the vine training method “*spurred cordon system*”

Vine variety: *Sangiovese Grosso*

Soil / Vineyards: Medium textured, calcareous soil. Careful management of the vegetative growth is aimed at low production yield and high quality.

Harvest and Winemaking: The harvest respects the maximum integrity of the grapes, which are made into wine using traditional techniques alongside modern technology, thereby obtaining wines with a beautiful color and structure.
